Envisioning the Futures - Designing and Building for People and the Environment

Rossano Albatici 2025-11-24

This book gathers the proceedings of the 12th International Conference of Ar.Tec. (Scientific Society of Architectural Engineering), Colloqui.AT.e, which was held in Trento, Italy on June 11-14, 2025, and brought together

scholars in the fields of construction and conservation history, building construction and performance, building design, and technologies. Digital transition and design of 4.0 buildings, digital twins for the management of historical building heritage, building-human-environment relationships, and mitigation of vulnerabilities for the preservation of the built environment are also explored. The contributions demonstrate that architectural engineering enables the construction of sustainable, resilient, adaptive, and high-performance buildings, and as such is instrumental in fighting against climate change.

Building Education and

Research explores this new active area of research in a series of papers by internationally acclaimed experts, presented at the CIB W89 International Conference on Building Education and Research held in July 1998 (BEAR `98) in Brisbane, Australia. Sponsored in collaboration jointly by the Queensland University of Technology, the Conseil International du Batiment (CIB) and the Australian Institute of Building (AIB), the conference was organised around the theme 'Building Research and Education Beyond 2000' and looks at the factors that are changing the requirements of building education and research: economic and technological concerns; environmental concerns; government policies; Industries' demands; re-evaluation of community expectations.
