Markets in Chaos Brendan Hughes 2023-11-10

This book is useful for those seeking to learn
about the history of market crises and
individuals that want to learn about protection

against downside risks for an investment
portfolio. The purpose of this book is not to
convince the reader to attempt to anticipate the
timing of the next market crash, but rather for
the reader to be able to draw parallels (and
some contrasts) between the different crises in
history. The book reviews case studies related to
specific macroeconomic event triggers ranging
from COVID-19 to hyperinflation. Readers will
come away with extensive knowledge of
different market crisis events spread across
countries and timelines. The reader will be well
versed on important macroeconomic topics such
as the history of currencies. Perhaps most
importantly, readers will feel better prepared to
handle the next market catastrophe. Audiences
such as business school students and those that
are a part of organizations such as the

Chartered Financial Analyst Institute will find this book of interest.
