Clio Wired Roy Rosenzweig 2011-01-27 In these pathbreaking essays, Roy Rosenzweig charts the impact of new media on teaching, researching, preserving, presenting, and understanding history. Negotiating between the "cyberenthusiasts" who champion technological breakthroughs and the "digital skeptics" who fear the end of traditional humanistic scholarship, Rosenzweig re-envision the practices and professional rites of academic historians while analyzing and advocating for the achievements of amateur historians. While he addresses the perils of "doing history" online, Rosenzweig eloquently identifies the promises of digital work, detailing innovative strategies for powerful searches in primary and secondary sources, the increased opportunities for dialogue and debate, and, most of all, the unprecedented access afforded by the Internet. Rosenzweig draws attention to the opening up of the historical record to new voices, the availability of documents and narratives to new audiences, and the attractions of digital technologies for new and diverse practitioners. Though he celebrates digital history's democratizing influences, Rosenzweig also argues that the

future of the past in this digital age can only be ensured through the active resistance to efforts by corporations to control access and profit from the Web.

Conversations Across Our America Louis G. Mendoza 2012-06-01 In the summer of 2007, Louis G. Mendoza set off on a bicycle trip across the United States with the intention of conducting a series of interviews along the way. Wanting to move beyond the media's limited portrayal of immigration as a conflict between newcomers and "citizens," he began speaking with people from all walks of life about their views on Latino immigration. From the tremendous number of oral histories Mendoza amassed, the resulting collection offers conversations with forty-three different people who speak of how they came to be here and why they made the journey. They touch upon how Latino immigration is changing in this country, and how this country is being changed by Latinoization. Interviewees reflect upon the concerns and fears they've encountered about the transformation of the national culture, and they relate their own experiences of living and working as "other" in the United States. Mendoza's collection is unique in its vastness. His subjects are from big cities and small towns. They are male and female, young and old, affluent and impoverished. Many are political, striving to change the situation of Latina/os in this country, but others are "everyday people," reflecting upon their lives in this country and on the lives they left behind. Mendoza's inclusion of this broad swath of voices begins to reflect the diverse nature of Latino immigration in the United States today.

Activism in the Name of God Jami L. Carlacio 2023-08-16 Contributions by Janet Allured, Lisa Pertillar Brevard, Jami L. Carlacio, Cheryl J. Fish, Angela Hornsby-Gutting, Jennifer McFarlane-Harris, Neely McLaughlin, Darcy Metcalfe, Phillip Luke Sinitiere, P. Jane Splawn, Laura L. Sullivan, and Hettie V. Williams *Activism in the Name of God: Religion and Black Feminist Public Intellectuals from the Nineteenth Century to the Present* recognizes

and celebrates twelve Black feminists who have made an indelible mark not just on Black women's intellectual history but on American intellectual history in general. The volume includes essays on Jarena Lee, Theresa Hoover, Pauli Murray, and Alexis Pauline Gumbs, to name a few. These women's commitment to the social, political, and economic well-being of oppressed people in the United States shaped their work in the public sphere, which took the form of preaching, writing, singing, marching, presiding over religious institutions, teaching, assuming leadership roles in the civil rights movement, and creating politically subversive print and digital art. This anthology offers readers exemplars with whose minds and spirits we can engage, from whose ideas we can learn, and upon whose social justice work we can build. The volume joins a burgeoning chorus of texts that calls attention to the creativity of Black women who galvanized their readers, listeners, and fellow activists to seek justice for the oppressed. Pushing back on centuries of institutionalized injustices that have relegated Black women to the sidelines, the work of these Black feminist public intellectuals reflects both Christian gospel ethics and non-Christian religious traditions that celebrate the wholeness of Black people.

Who's who in American Law 2003

Blue Revolution Cynthia Barnett 2011-09-20

Americans see water as abundant and cheap: we turn on the faucet and out it gushes, for less than a penny a gallon. We use more water than any other culture in the world, much to quench what's now our largest crop—the lawn. Yet most Americans cannot name the river or aquifer that flows to our taps, irrigates our food, and produces our electricity. And most don't realize these freshwater sources are in deep trouble. *Blue Revolution* exposes the truth about the water crisis—driven not as much by lawn sprinklers as by a tradition that has encouraged everyone, from homeowners to farmers to utilities, to tap more and more. But the book also offers much reason for hope. Award-winning journalist Cynthia Barnett argues that the best solution is also the simplest and least expensive: a water ethic for America. Just as the green movement helped build awareness about energy

and sustainability, so a blue movement will reconnect Americans to their water, helping us value and conserve our most life-giving resource. Avoiding past mistakes, living within our water means, and turning to “local water” as we do local foods are all part of this new, blue revolution. Reporting from across the country and around the globe, Barnett shows how people, businesses, and governments have come together to dramatically reduce water use and reverse the water crisis. Entire metro areas, such as San Antonio, Texas, have halved per capita water use. Singapore's “closed water loop” recycles every drop. New technologies can slash agricultural irrigation in half: businesses can save a lot of water—and a lot of money—with designs as simple as recycling air-conditioning condensate. The first book to call for a national water ethic, *Blue Revolution* is also a powerful meditation on water and community in America.

A History of Modern France Jeremy D. Popkin 2016-05-23 Organized chronologically, *A History of Modern France* presents a survey of the dramatic events that have punctuated French history, including the French Revolution, the upheavals of the 19th century, the world wars of the 20th century, and France's current role in the European Union. Written for today's undergraduate students, the text presents scholarly controversies in an unbiased manner and reflects the best of contemporary scholarship in French history.

Teaching to Change the World Jeannie Oakes 2015-11-17 This is an up-to-the-moment, engaging, multicultural introduction to education and teaching and the challenges and opportunities they present. Together, the four authors bring a rich blend of theory and practical application to this groundbreaking text. Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade

the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today's schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. Click Here for Book Website Pedagogical Features: Digging Deeper sections referenced at the end of each chapter and featured online include supplementary readings and resources from scholars and practitioners who are addressing issues raised in the text. Instructor's Manual offers insights about how to teach course content in ways that are consistent with cognitive and sociocultural learning theories, culturally diverse pedagogy, and authentic assessment. Cases in Public Policy and Administration Jay M. Shafritz 2015-08-07 Writing the perfect complement to their bestseller, *Introducing Public Administration*, Shafritz and Borick highlight the great drama inherent in public policy -- and the ingenuity of its makers and administrators -- in this new casebook that brings thrilling, true life adventures in public administration to life in an engaging, witty style. Drawing on a unique assortment of literary, historic, and modern examples, *Cases in Public Policy and Administration* exposes students to public administration in practice by telling the tales of: How Thurgood Marshall led the legal fight for civil rights and made it possible for Barack Obama to become president How the ideas of an academic economist and a famous novelist led to the recession that started in 2008 How Al Gore really deserves just a little bit of credit for inventing the Internet How the decision was made by President Harry Truman to drop the first atomic bomb on Japan in order to end World War II How the current American welfare state was inspired by a German chancellor How a Nazi war criminal inadvertently provided the world with a lesson in bureaucratic ethics How Napoleon Bonaparte encouraged the job of chief of staff to escape from the military and live in contemporary civilian offices How an obscure state department bureaucrat wrote the policy of containment that allowed the United States to win the Cold War with the Soviet Union How Dwight D. Eisenhower was started on the road to the presidency by a mentor he found in the Panamanian rain forest How Florence Nightingale gathered statistics during the Crimean War that helped lead to contemporary program evaluation.

The Brief Edition of *A People and a Nation* preserves the text's basic approach to American history as a story of all American people. Known for a number of strengths, including its well-respected author team and engaging narrative,

the book emphasizes social history, giving particular attention to race and racial identity. Through its thoughtful inclusion of everyday people, cultural diversity, work, and popular culture, *A People and a Nation* brings history to life. Like its full-length counterpart, the Brief Seventh Edition challenges students to think about the implications of events in American history. Several popular features have been retained and updated, including "Legacies for a People and a Nation" and chapter-opening vignettes. A new "Links to the World" feature connects U.S. history to global events and provides Web links for further research on topics such as international piracy, baseball in Japan, OPEC, and AIDS.
