Exploring Chemistry (Loose-Leaf) Matthew Johll 2012-05-04 Matthew Johll's Exploring Chemistry covers the standard topics for the nonmajors course in the typical order, but each chapter unfolds in the context of a single case study that helps students connect what they are learning to real-life situations. For example, students work through the often-difficult topics of molecular structure, gas laws, and organic chemistry by learning about the development of powerful new chemotherapy drugs, new technologies for screening airline passengers, and the creation of biodegradable biopolymers. It's the same case-driven approach that Johll uses in his acclaimed Investigating Chemistry (now in its Third Edition) but Exploring Chemistry goes beyond the other book's specific focus on examples from forensic science to use real-life stories from cooking, athletics, genetics, green chemistry, and more.

**Let's Review** Albert S. Tarendash 1998

*The Body Temple* Duane McEndree 2009-10 From the beginning of time, mankind has searched the heavens to solve mysteries that would explain their existence on this unique blue planet. Huge telescopes have been developed that reveal some of the amazing intricacies of the universe. The Doctors McEndree turn these telescopes into microscopes. The Doctors reveal in a unique way how God has placed within every system of the body, every organ, and every microscopic cell, a revelation of His plan of salvation. The story of redemption is told in the masterwork of God as we search the universe within the human body sanctuary. As God revealed Himself in the symbols found in the heavenly and earthly sanctuary, He reveals Himself again in the construction and workings of the Body Temple. God illumines His character of goodness, grace, mercy and love in microcosm in this unique evidence of anatomy and physiology as God made manifest His masterpiece--The Body Temple.
