**C Primer Plus** Stephen Prata 2002 The new classic! C Primer Plus, now in its 5th edition, has been revised to include over 20 new programming exercises, newly improved examples and the new ANSI/ISO standard, C99. Task-oriented examples will teach you the fundamentals of C programming. From extended integer types and compound literals to Boolean support and variable-length arrays, you will learn to create practical and real-world applications with C programming. Review questions and programming exercises at the end of each chapter will reinforce what you have learned. This friendly and easy-to-use self-study guide will help you understand the fundamentals of this core programming language.

## **Joe Grand's Best of Hardware, Wireless, and Game Console**

**Hacking** Joe Grand 2006-08-18 The book introduces the principles of hardware design and describes the tools and techniques required to begin hacking. The DVD contains hack instructions for over 20 game consoles and hardware devices from Nintendo, Apple, Sony, Microsoft, Palm and more. The presentation of these 20 projects on DVD media provides users with benefits and options not available on the printed page. All images are hi-res color that can be enlarged or printed, the text is easily searched, and the user can copy the contents to their hard disk and add comments directly into the PDF files. The DVD media also lends itself well to group projects (it includes a 10 user license). The 160-page book includes chapters on hacking tools and electrical engineering basics, along with chapters on the background, design and functionality of each hardware device.\* Packed full of high resolution colour images that reveal the smallest details of each step in a hack\* Includes in depth coverage of the tools of the hacking trade and the basics of electrical engineering\* DVD includes a "Using the Tools" video starring Joe "kingpin" Grand

## **Languages and Compilers for Parallel Computing** Larry Carter

2003-06-29 In August 1999, the Twelfth Workshop on Languages and Compilers for Parallel Computing (LCPC) was hosted by the Hierarchical Tiling Research group from the Computer Science and Engineering Department at the University of California San Diego (UCSD). The workshop is an annual international forum for leading research groups to present their current research activities and the latest results. It has also been a place for researchers and practitioners to interact closely and exchange ideas about future directions. Among the topics of interest to the workshop are language features, code generation, debugging, optimization, communication and distributed shared memory libraries, distributed object systems, resource management systems, integration of compiler and runtime systems, irregular and dynamic applications, and performance evaluation. In 1999, the workshop was held at the International Relations/Pacific Studies Auditorium and the San Diego Supercomputer Center at UCSD. Seventy-seven researchers from Australia, England, France, Germany, Korea, Spain, and the United States attended the workshop, an increase of over 50% from 1998.
