**The Graduate Student's Backpack** Ronald D. Taskey 2020-05-05 The new graduate student must select a graduate committee, plan course work, find an original research topic, and design a research plan that ultimately leads to a defensible thesis or series of publishable research articles. Whether a graduate student plans a research career or not, he or she typically must complete an original, independent, analytical study, even though few beginning students know how or where to begin. A little help would be good, right? This process-oriented manual holds the fundamentals

students in the sciences need to trek the graduate school path—it is their “backpack.” Open it and see what it can do for you.

**Writing Your Dissertation with Microsoft Word** Vincent Kiernan 2005 A dissertation is the crowning achievement of years of graduate study. But many graduate students struggle long hours with formatting their dissertations properly. This book guides a graduate student, step by step, thorough the process of using Microsoft Word to produce a dissertation that meets the requirements of the student's graduate school -- the first time it's submitted. Throughout, the book uses real-world examples of formatting requirements from actual graduate schools, and is amply illustrated to provide a visual guide to working through Microsoft Word. Tips and tricks about Word will help a graduate student devote time to the content of the dissertation, not its formatting.
