Planning & Designing Health Care Facilities in Developing Countries

Shashikant Sharma 2024-07-16 Building a clinically integrated workplace with a high level of clinical competence requires careful considerations of Hospital Planning. For greenfield or brownfield hospital projects, clinicians and C-Suite executives need to acquire capabilities to address the planning needs of any organization. This book aims to provide both theoretical and practical inputs for the Planning & Designing of Health Care Facilities in Developing Countries. It clearly indicates the steps to be followed, facts to be weighed, and components to be considered to arrive at a correct planning solution. With health reform looming and the revenue base shifting rapidly, we need to integrate patient safety concerns in the design process. Key Features • Liberal use of tables and figures to support conclusions, illustrate concepts, and display quantitative information, making it easier for readers to understand and refer to large quantities of data • Integrates the international norms for planning and designing health care facilities into the developing country setting • Handbook and ready reckoner for C-Suite executives, hospital engineers, project consultants, and hospital administration students
