Planning for Learning Mary Renck Jalongo 2007 This book represents the next step in the critical role that lesson planning plays in effective teaching. The authors examine practices from many different areas of education in the U.S. and around the world to create an approach to lesson planning and evaluation that will work in today's diverse school settings. The heart of the book demonstrates collaborative lesson planning for teachers at particular career phases--preservice, novice, and experienced.

Turning on Learning Carl A. Grant 2003 This new Fourth Edition contains many lesson plans that cover a variety of subject areas and grade levels (1-12), as well as action research activities that investigate the various dimensions of teaching. Many of the lesson plans are written by actual classroom teachers, and all of them have been examined by practicing teachers. More than simply a "how-to" manual, it is designed to help the teacher or teacher education student teach from a multicultural perspective. Each lesson plan offers a "Before" version (the lesson as it is usually taught) and an "After" version (how the lesson can be improved to "turn on" learning). A discussion explaining why the changes were made follows each lesson plan.
