Global Status Report on Road Safety 2018 World Health Organization 2019-01-10 The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

Customary International Humanitarian Law Jean-Marie Henckaerts 2005 In 1996, the International Committee of the Red Cross, alongside a range of renowned experts, embarked upon a major international study into current state practice in international humanitarian law in order to identify customary law in this area. This book is the result of that study, a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed

conflicts. Given that important treaties in this area have not yet been universally ratified, this is a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts.

International Financial Statistics, June 2016 International Monetary Fund. Statistics Dept. 2016-05-31 The June 2016 issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of international and domestic finance. IFS publishes, for most countries of the world, current data on exchange rates, international liquidity, international banking, money and banking, interest rates, prices, production, international transactions (including balance of payments and international investment position), government finance, and national accounts. The country table notes in the monthly issues identify the exchange rates used. Quotas are reviewed at intervals of not more than five years. The reviews take account of changes in the relative economic positions of members and the growth of the world economy. The IMF normally determines the currencies that are used in transactions and operations with members. Each quarter, the IMF prepares a financial transactions plan, in which it indicates the amounts of currencies and SDRs to be used during the relevant period.
