Combination calculator (nCr) with a solution. Computes the number of possible combinations and generates all the arrangements, whether with or without repetitions. The meaning of COMBINATION is a result or product of combining; especially : an alliance of individuals, corporations, or states united to achieve a social, political, or economic end. Permutations are specific selections of elements within a set where the order in which the elements are arranged is important, while combinations involve the selection of elements without regard for order. When the order doesn't matter, it is a Combination. When the order does matter it is a Permutation. So, we should really call this a "Permutation Lock"! In other words: A Permutation is an ordered ... COMBINATION definition: 1. the mixture you get when two or more things are combined: 2. an arrangement in a particular.... Learn more.
