The Summary 1912

The Short Story in South Africa Rebecca Fasselt 2022-03-24 This book considers the key critical interventions on short story writing in South Africa written in English since the year 2000. The short story genre, whilst often marginalised in national literary canons, has been central to the trajectory of literary history in South Africa. In recent years, the short story has undergone a significant renaissance, with new collections and young writers making a significant impact on the contemporary literary scene, and subgenres such as speculative fiction, erotic fiction, flash fiction and queer fiction expanding rapidly in popularity. This book examines the role of the short story genre in reflecting or championing new developments in South African writing and the ways in which traditional boundaries and definitions of the short story in South Africa have been reimagined in the present. Drawing together a range of critical interventions, including scholarly articles, interviews and personal reflective pieces, the volume traces some of the aesthetic and thematic continuities and discontinuities in the genre and sheds new light on questions of literary form. Finally, the book considers the place of the short story in twenty-first century writing and interrogates the ways in which the short story form may contribute to, or recast ideas of, the post-

apartheid or post-transitional. The perfect guide to contemporary short story writing in South Africa, this book will be essential reading for researchers of African literature.

DiGennaro Reed 2015-09-09 This volume examines ways in which service delivery to individuals with autism can be improved from both ends of the basic-applied research spectrum. It introduces the concept of translational scholarship and examines real-world value in developing relevant interventions. Each area of coverage reviews current findings on autism from basic research and, then, discusses the latest applied research literature to create a roadmap for researchers, clinicians, and scientist-practitioners to develop new, effective strategies as children, adolescents, and adults with autism continue to learn and grow. Featured coverage includes: Why practice needs science and how science informs practice. The social learning disorder of stimulus salience in autism. Assessment and treatment of problem behaviors associated with transitions. Understanding persistence and improving treatment through behavioral momentum theory. The behavioral economics of reinforcer value. Increasing tolerance for delay with children and adults with autism. In addition, the book addresses the use of ABA in education and explores compliance training, on-task behavior, teaching play and social skills, listening and academic skills, technology, remembering and cognitions, picture-based instruction, foreign language instruction, teaching verbal behavior, public speaking, and vocational skills. In addition, the book covers treatments for tics, trichotillomania, stereotypies, self-injurious behavior, aggression, and toe walking. It also addresses ABA for special populations, including individuals with autism, ADHD, substance abuse, and intellectual disabilities. Featured areas of coverage include: Basic assessment methods, such as observing behavior, treatment integrity, social validation, evaluating physical activity, measuring sleep disturbances, preference assessment, and establishing criteria for skill mastery. Functional assessment, including how to quantify outcomes and evaluate results, behaviors that precede and are linked to target behaviors, and treatments.
