Quantitative Decision Making Dr. Prashant S. Kadu I Dr. Mukul Burghate Similar to operations management, project management employs an array of quantitative techniques while performing planning, scheduling, forecasting, and monitoring tasks. The main purpose of the quantitative approach is to make an optimal decision by using mathematical and statistical models in a situation when the probability of all outcomes is uncertain. Quantitative approach to decision-making produces the best results when the problem is clearly defined, several alternatives exist, and decision outcomes are easily measurable.

However, in the case that many external factors are outside of the decision-maker's control and their probability is unknown, the quantitative methods can become unreliable. The purpose of this study Material is to present an introduction to the subjects of MBA Semester-I. The contents of this text will also cater to the students of courses like DFM, DMM, M.Com and B.Com, etc. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers. An attempt is made here by the expert author to assist the students by way of providing Study Material as per the curriculum with no commercial considerations. However, it is implicit that these are exam-oriented Study Material only and students are advised to attend regular classes and utilize reference books available in the library for In-depth knowledge. We owe to many websites and their free contents; we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book. We acknowledge our thanks to them. At the end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful. Dr. Mukul Burghate Author

APC Learning Mathematics - Class 8 (CBSE) - Avichal Publishing Company M.L. Aggarwal Learning Mathematics - Class 8 has been written by Prof. M.L. Aggarwal in accordance with the latest syllabus of the NCERT and Guidelines issued by the CBSE on Comprehensive and Continuous Evaluation (CCE). The subject matter has been explained in a simple language and includes many examples from real life situations. Questions in the form of Fill in the Blanks, True/False statements and Multiple Choice Questions have been given under the heading 'Mental Maths'. Some Value Based Questions have also been included to impart values among students. In addition to normal questions, some Higher Order Thinking Skills (HOTS) questions have been given to enhance the analytical thinking of the students. Each chapter is followed by a Summary which recapitulates the new terms, concepts and results.

[Takeaways from Teaching through a Pandemic](#) Katherine Seaton 2024-02-01 In this insightful volume, more than 50 educators from 4 continents outline thoughtful and intentional innovations of lasting value made in their teaching of tertiary mathematics and statistics, in response to COVID -19 pandemic-related campus closures. The examples given in 20 practical chapters fall into three themes: utilization of relevant technologies, discipline-appropriate assessment alternatives, and support for learning and engagement.

The first theme explored is the utilization of the affordances of communications technology and mathematical software and online tools, to create learning resources and activities for virtual classrooms. The second theme is the design of sound assessment alternatives, together with the associated issue of maintaining academic integrity, in disciplines accustomed to established question styles and face-to-face exams. Finally, a range of activities to encourage engagement and support learning and teaching, both online and as campuses re-opened, is described. Due to their ongoing relevance and benefits for tertiary mathematics education, be that of pre-service teachers, engineers or mathematics majors, the examples found in these 20 practical chapters are 'takeaways' or 'keepers'. This book was originally published as a special issue of International Journal of Mathematical Education in Science and Technology.

[Networking of Theories as a Research Practice in Mathematics Education](#) Angelika Bikner-Ahsbals 2014-08-25 How can we deal with the diversity of theories in mathematics education? This was the main question that led the authors of this book to found the Networking Theories Group. Starting from the shared assumption that the existence of different theories is a resource for mathematics education research, the authors have explored the possibilities of interactions between theories, such as contrasting, coordinating, and locally integrating them. The book explains and illustrates what it means to network theories; it presents networking as a challenging but fruitful research practice and shows how the Group dealt with this challenge considering five theoretical approaches, namely the approach of Action, Production, and Communication (APC), the Theory of Didactical Situations (TDS), the Anthropological Theory of the Didactic (ATD), the approach of Abstraction in Context (AiC), and the Theory of Interest-Dense Situations (IDS). A synthetic presentation of each theory and their connections shows how the activity of networking generates questions at the theoretical, methodological and practical levels and how the work on these questions leads to both theoretical and practical progress. The core of the book consists of four new networking case studies which illustrate what exactly can be gained by this approach and what kind of difficulties might arise.
