Helmets: a road safety manual for decision-makers and practitioners

World Health Organization

2023-03-24 This

second edition of *Helmets: a*

road safety manual for

decision-makers and

practitioners has updated the

evidence on risk factors and

interventions for helmet use.

The manual is aimed at policy-

makers and road safety

practitioners and draws on

experience from countries that

have succeeded in promoting

helmet use. The effectiveness

of helmets in reducing head

injuries and preventing death

has been established by several

found by several studies.

However, ensuring the use of

helmets requires additional

interventions. These include

developing and passing a law

for helmet use among PTW

users, developing helmet

standards suitable for all age groups and appropriate for the

local weather, enforcement of

the law by police, and

education programmes to

increase awareness of the law

and benefits from its

compliance.

ESL (ELL) Literacy

Instruction Lee Gunderson

2013-07-31 ESL (ELL) Literacy

Instruction provides both ESL

and mainstream teachers with

the background and expertise

necessary to plan and

implement reading programs

that match the particular needs

and abilities of their students.

Comprehensive and research-

based, it applies current ESL

and reading research and

theory to practice. Designed

for use by pre-service and in-

service teachers at all levels

from kindergarten to adult

learners, it explains different

models of literacy instruction

from systematic phonics to whole language instruction and includes specific teaching methods within each model. Multicultural issues are addressed. Instructional matrices that account for the wide variations in ESL (ELL) student backgrounds and abilities form the pedagogical basis of the approach described in the text. The matrices, based on extensive research, involve two easily measured variables that predict what programs and approaches will be comprehensible for learners who vary in age, literacy background, English ability, and program needs. Readers are encouraged to develop their own teaching strategies within their own instructional models.
