Eternally Yours Ed van Hinte 2004 This book aims to map out ways of designing and planning products so that their value is sustained and they can be kept in use for a longer time. It tells the story of Vivian, a name that represents any product. The life of Vivian is traced from preconception, through development, purchase and long period of use, right up to oblivion. Vivian's story is embedded in the information and experiences that the Eternally Yours Foundation has gathered over the

past years, culminating in the 'Time in design' conference organized in October 2003 in cooperation with the Long Now Foundation. This book includes most of the lectures by, among many others, Ezio Manzini, Brian Eno, Gustaf Beumer and John Thackara - introduction.

Green Households Klaas Jan Noorman 2014-01-14 Households are one of the main sources of waste and of other environmental impacts. This is a study of domestic consumption. Drawing on empirical research largely from The Netherlands, it takes households as consumer units and examines the entire household metabolism. This includes the way domestic demand can influence where and how goods and services are produced, resource flows through households, and the differential impacts of different lifestyles. It shows both what would constitute sustainable domestic consumption and how far there is to go to achieve this.

Handbook of ICU EEG Monitoring Suzette LaRoche 2018-02-28 Continuous EEG monitoring is an important tool for assessing brain function and allows clinicians to identify malignant EEG patterns quickly and provide more effective care. The revised and updated second edition of *Handbook of ICU EEG Monitoring* distills the wide range of technical and clinical issues encountered in successful critical care EEG for the busy clinician. Written by leading experts in this rapidly evolving field, the handbook incorporates the ground-breaking advances that have impacted practice since publication of the first edition. Concise chapters break down the fundamentals of EEG acquisition and other technical considerations, clinical indications, EEG interpretation, treatment, and administrative concerns. Entirely new chapters on cardiac arrest in adults, neonatal seizures, periodic and rhythmic patterns, and inter-rater agreement for interpretation in the ICU are included, along with new

neonatal guidelines and ACNS adult and pediatric consensus statements. All existing chapters have been revised and updated to include the latest information, and coverage of quantitative EEG (QEEG) is expanded to reflect the expanding role of this technology in reviewing ICU EEG recordings. Formatted for maximum utility with bulleted text and banner heads to reinforce essential information. Key Features: Revised and updated second edition encompasses the current scope of clinical practice Broad but practical reference covering all aspects of ICU EEG monitoring Six entirely new chapters and many new expert authors and topics Thorough discussion of the indications for ICU EEG monitoring and prevalence of seizures in patient subgroups Focuses on the challenges of EEG interpretation that are unique to EEG monitoring in the ICU Key points and future directions/unanswered questions highlighted in every chapter Includes hard-to-find information on technical aspects, indications, billing and coding, and other administrative and procedural concerns Access to downloadable ebook, supplemented with additional EEG examples and clinical cases **More Trouble with Maths** Steve Chinn 2012-05-23 There are many factors that can contribute to the learning difficulties children and adults have with mathematics. These include poor working memory, difficulties in retrieving so-called 'basic' facts and the ability to remember and apply formulas and procedures correctly. This highly practical teacher resource is for anyone who would like to accurately and effectively identify dyscalculia amongst their pupils. Written in an engaging and user-friendly style, Steve Chinn draws on his extensive experience and expertise and shows how to consider all the factors relating to mathematical learning difficulties explains how these factors can be investigated explores their impact on learning discusses and provides a range of tests ranging from pre-requisite skills such as working memory to a critique of normative tests for mathematics knowledge and skills. The book will guide the reader in the interpretation of tests, emphasising the need for a clinical approach when assessing individuals, and shows how diagnosis and assessment can become part of everyday teaching. This resource also includes pragmatic tests which can be implemented in

the classroom, and shows how identifying the barriers is the first step in setting up any programme of intervention.
