McGraw-Hill Concise Encyclopedia of Engineering McGraw Hill 2005-06-15

Hundreds of well-illustrated articles explore the most important fields of science. Based on content from the McGraw-Hill Concise Encyclopedia of Science & Technology, Fifth Edition, the most widely used and respected science reference of its kind in print, each of these subject-specific quick-reference guides features:

- * Detailed, well-illustrated explanations, not just definitions
- * Hundreds of concise yet authoritative articles in each volume
- * An easy-to-understand presentation, accessible and interesting to non-specialists
- * A portable, convenient format
- * Bibliographies, appendices, and other information supplement the articles

Sensors, Devices and Systems Constantine Bazilo 2026-04-30 This book presents an integrated overview of modern sensor technologies and intelligent measurement systems. It combines research on digital signal processing, distributed IIoT architectures, embedded systems, and cybersecurity for resource-limited nodes. Such integration enhances accuracy, interference resistance, scalability, and computational efficiency, improving monitoring and diagnostic performance. A key focus is the convergence of sensors with artificial intelligence and machine learning, enabling multichannel data analysis, anomaly detection, and predictive maintenance through digital twins and adaptive algorithms.

This approach ensures high diagnostic sensitivity, reliability, and autonomous real-time decision-making in industrial and technical systems. The book also covers developments in microelectronics, MEMS, and robotics, from material design and metrological validation to embedded implementation. Advanced transducers and actuators increase energy efficiency and interface compatibility. Contributions on biomedical, optoelectronic, photonic, energy, and environmental sensors highlight improved precision and integration with IoT analytics, confirming the vital role of sensor technologies in medicine, energy, and sustainability. The book is of interest to experts in the field of automation, computer integrated technologies, robotics, and related spheres, as well as scientists, and Ph.D. students.

Advanced Routing Protocols for Wireless

Networks Miguel Elias Mitre Campista
2014-06-02 This text introduces the principles of routing protocols and metrics as they affect wireless networking environments, specifically in urban areas. Timely because of the recent rise in small city life, this topic includes the consideration of ad hoc, mesh, vehicular, sensor, and delay tolerant networks. These approaches are each unique, and author Miguel Mitre Campista provides a thorough, but accessible, explanation of their individual characteristics for engineers, computer scientists, IT professionals, and curious Internet users.

2019-10-25 This book constitutes the proceedings of the 17th International Conference on Service-Oriented Computing, ICSOC 2019, held in Toulouse, France, in October 2019. The 28 full and 12 short papers presented together with 7 poster and 2 invited papers in this volume were carefully reviewed and selected from 181 submissions. The papers have been organized in the following topical sections: Service Engineering; Run-time Service Operations and Management; Services and Data; Services in the Cloud; Services on the Internet of Things; Services in Organizations, Business and Society; and Services at the Edge.

Proceedings of the Third International Conference on Trends in Computational and Cognitive Engineering M. Shamim Kaiser

2022-02-28 This book presents various computational and cognitive modeling approaches in the areas of health, education, finance, environment, engineering, commerce, and industry. It is a collection of selected

conference papers presented at the 3rd International Conference on Trends in Cognitive Computation Engineering (TCCE 2021), hosted online by Universiti Tun Hussein Onn Malaysia (UTHM) during October 21-22, 2021. It shares cutting-edge insights and ideas from mathematicians, engineers, scientists, and researchers and discusses fresh perspectives on problem solving in a range of research areas.

Advances in Production Management Systems. Initiatives for a Sustainable World

Irenilza Nääs 2017-03-15 This book constitutes the refereed post-conference proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2016, held in Iguassu Falls, Brazil, in September 2016. The 117 revised full papers were carefully reviewed and selected from 164 submissions. They are organized in the following topical sections: computational intelligence in production management; intelligent manufacturing systems; knowledge-based PLM;

Revolutionizing Education through Web-Based Instruction Raisinghani, Mahesh 2016-02-29 The proliferation of technology has affected all aspects of human life, yet the continuing

possibilities of their effects on education have yet to be fully explored. When viewed separately, one may believe that only paltry solutions can be wrought from online and web-based education; however, when applied and studied in a dynamic, interactive sense, these advancements may alter the very notion of learning and education. Revolutionizing Education through Web-Based Instruction is a comprehensive, multi-disciplinary exploration of the emerging digital opportunities available to educators. This book presents contemporary theoretical frameworks as well as practical research findings that support the use of these new computer-assisted teaching techniques. The myriad of research-based topics featured in this book allow for a thorough, diverse discussion about education, technology, and the intersection therein. This title is an invaluable resource for instructors, students of education, and researchers and professionals in the fields of knowledge management.

ECCWS 2020 19th European Conference on Cyber Warfare and Security Dr Thaddeus Eze 2020-06-25 These proceedings represent the work of contributors to the 19th European Conference on Cyber Warfare and Security (ECCWS 2020), supported by University of Chester, UK on 25-26 June 2020. The Conference Co-chairs are Dr Thaddeus Eze and Dr Lee Speakman, both from University of Chester and the Programme Chair is Dr Cyril Onwubiko from IEEE and Director, Cyber Security Intelligence at Research Series Limited. ECCWS is a well-established event on the academic research calendar and now in its 19th

year the key aim remains the opportunity for participants to share ideas and meet. The conference was due to be held at University of Chester, UK, but due to the global Covid-19 pandemic it was moved online to be held as a virtual event. The scope of papers will ensure an interesting conference. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research.
