Economics Arthur O'Sullivan 1998 The most successful first edition of a principles of economics text in Prentice Hall history. The authors build a framework for economic reasoning on the Five Principles of Economics then move the student from memorization to understanding by applying these simple, intuitive and memorable principles repeatedly throughout the text in an "active learning" environment (Economic Experiments, Economic Detective, Using the Tools). The goal is for students to not only think like economists, but to act like economists. The economic analysis is rigorous yet accessible to the average student. The organization is modern and balanced, with equal weight given to Classical (long-run comes first), Keynesian, and Monetarist philosophies, with an effort to show how they are linked. Designed for that majority of students who will not go on to other economics courses, the text also functions as a solid foundation for more advanced courses. PHLIP supported.

Economics Ronald M. Ayres 2005 This easy-to-read, accessible, macro-first principles book engages readers with familiar real-world examples and applications that bring economics to life. The authors follow an Explore and Apply theme that shows learners how economics is a part of their everyday lives, and how it can be a useful tool in making personal decisions and evaluating policy decisions. The Enhanced Edition contains more detail and more in-depth coverage of key economic concepts, expanded multiplier coverage, new coverage of crowding out, greater detail on exchange rates, more extensive treatment of antitrust, and much more. For individuals interested in the principles of economics-and how those principles effect the details of daily living.

Economics 'sampler' R. Glenn Hubbard 2005 Hubbard & O'Brien motivate the study of economics through real business examples. The #1 question students of economics ask themselves is: "Why am I here, and will I ever use this"? Hubbard & O'Brien answer this question by demonstrating that real businesses use economics to make real decisions daily. This is motivating to all students, whether they are business majors or not. All students can relate to businesses they encounter in their everyday lives. Whether they open an art studio, do social work, trade on Wall Street, work for the government, or bartend at the local pub, students will benefit from understanding the economic forces behind their work.
