Which Degree Directory Series 2000

Advanced Economics Through Diagrams

Andrew Gillespie 2001 DT These highly successful revision guides have been brought right up-to-date for the new A Level specifications introduced in September 2000. DT Oxford Revision Guides are highly effective for both individual revision and classroom summary work. The unique visual format makes the key concepts and processes, and the links between them, easier to memorize. DT Students will save valuable revision time by using these notes instead of condensing their own. DT In fact, many students are choosing to buy their own copies so that they can colour code or highlight them as they might do with their own revision notes.

Higher National Engineering Curriculum Support Pack

Mike Tooley 2012-09-10 Used alongside the students' text, Higher National Engineering 2nd edition, this pack offers a complete suite of lecturer resource material and photocopiable handouts for the compulsory core units of the 2003 BTEC Higher Nationals in Engineering. Full coverage is given of the common core units for HNC/D (units 1 - 3) for all pathways, as well as the two different Engineering Principles units (unit 5) for mechanical and electrical/electronic engineering, and the additional unit required at HND for these pathways (Engineering Design - unit 6). The authors provide all the resources needed by a busy lecturer, as well as a bank of student-centred practical work and revision material, which will enable students to gain the skills, knowledge and understanding they require. This pack will save a course team many hours' work preparing handouts and assignments, and is freely photocopiable within the purchasing institution. The pack includes: * Exercises to support and develop work in the accompanying student text * Planned projects which will enable students to display a wide range of skills and use their own initiative * Reference material for use as hand-outs * Background on running the new HNC/HND

courses * Tutor's notes supporting activities in the students' book and resource pack
World Yearbook of Education 2016 Antoni Verger 2016-01-08 This latest volume in the World Yearbook of Education series examines the global education industry both in OECD* countries as well as developing countries, and presents the works of scholars based in different parts of the world who have significantly contributed to this area of research. Focusing on the areas of cross-over in public-private partnerships in education, WYBE 2016 critically examines the actors and factors that have propelled the global rise of the education industry. Split into three key sections, Part I explores how education agendas are shaped; Part II considers the private financing of education and the export of school improvements to professional consultancies; and Part III analyses new market niches, such as low-fee private schooling and for-profit education provisions. The book draws upon case studies of many global organizations, including: The Bill and Melinda Gates Foundation Pearson Affordable Learning Fund Bridge International Academies Teach for All Omega Schools Co-edited by three internationally renowned scholars, Antoni Verger, Christopher Lubienski and Gita Steiner-Khamsi, WYBE 2016 will be a valuable resource for researchers, graduates and policy makers who are interested in the global education industry. *Convention on the Organisation for Economic Co-operation and Development.

Developing Numeracy in Further Education Graham Hall 2016-10-03 This book presents examples of numeracy applications developed in a wide range of courses in a Further Education college in Wales. The numeracy case studies are not limited to simple arithmetic and tasks involving shape and space, but include more advanced topics such as: statistical analysis, mathematical modelling, calculus and design of algorithms. A broad definition of numeracy is adopted by the authors, in line with the range of numeracy skills expected and valued by employers. In addition to a knowledge of mathematical techniques, numeracy is considered to include: problem solving, especially in the design of solutions to non-routine tasks; communication of mathematical results in formats which are suitable for the intended audience and facilitate decision making; an ability to use computer technology to

collect and process data; and a familiarity with number which allows appropriate levels of accuracy to be chosen, estimates made and errors detected.
