Description Oracle's suite of
applications is used by many
major businesses and public
sector organizations
throughout the world. Oracle
E-Business Suite is the most
comprehensive suite of
integrated, global business
applications that enable
organizations to make better
decisions, reduce costs, and
increase performance. The
book will show you how to
build different types of
extensions with different
toolsets. It will take you from
start to finish with fully
working examples. This book
will show readers a wide
variety of step-by-step
examples of how to extend
Oracle E-Business Suite
Release 12 in a number of
areas. The book focuses on OA
Framework personalization and
development, WebADI, and BI
Publisher. It will take readers
through the process of how to
get started and what tools are
needed. It will explain how to

develop working examples and how to deploy them within Oracle E-Business Suite Release 12. Learn how to extend Oracle E-Business Suite (EBS) Release 12, using detailed examples to work through how various components are configured and how we can extend standard functionality. The book focuses on OA Framework personalization and development, desktop integration (formerly WebADI), and BI Publisher and each chapter will introduce the topic before going through working examples from start to finish. There are plenty of detailed illustrations throughout each chapter giving clear instructions of what we are doing and why. Each topic will develop a solution that will utilize common core components of a subject area. It focuses on starting an extension right from the beginning to deploying it within E-Business Suite. At the end of each chapter the reader will have a good understanding of what they need to do for

each area to take away and start using it in practice. Each chapter will detail how to build an extension in the supported manner and also comes with complete, fully tested code and scripts that can be downloaded. What you will learn Get an overview of the architecture of release 12; learn about the file system and where files need to go Gain an understanding of how we can personalize OA Framework pages in Oracle E-Business Suite (EBS) Gain an understanding of the architecture of an OA Framework page Install JDeveloper with OA Extension and set up a development environment Deploy an OA Framework page in Oracle E-Business Suite (EBS) and run it through the application Learn how to use BI Publisher for authoring, managing, and delivering highly-formatted documents Create BI Publisher template files and then distribute populated templates to the file system and via email Learn to configure a browser and MS office settings in

Oracle E-Business Suite: the little r12.2.6 upgrade essentials for managers and team members Mike Swing
2017-05-16 Putting together the right team to tackle the Oracle E-Business Suite R12.2.6 upgrade, and understanding the issues that the team needs to consider to

be successful, can be quite a challenge. "the little r12.2.6 upgrade essentials for managers and team members" describes the big picture of what you need to consider before tackling the Release 12.2.6 upgrade. Based on TruTek's popular R11i to R12 Technical Upgrade training classes, this book describes what managers, functional, and technical team members need to know to prepare to upgrade from Release 11i to Release 12.2.6 of Oracle's E-Business Suite of Applications. Enhanced topics with this edition include: Online Patching, the ADOP Patching Cycle, Materialized Views, Customizations, Development Standards for Edition Based Redefinition, How Cross-Edition Triggers Work, and Understanding the Release 12.2 Architecture.
