Rope Rescue Technician Manual 6th Edition James A. Frank 2021-04-01

The CMC Rope Rescue Technician Manual is the standard text for many fire departments, rescue teams and training programs across the country. The sixth edition reflects the latest advances in technology, equipment and procedures available to rescue professionals. Its concise style clearly sequences and describes the elements of rope rescue in a way that is both detailed and easy to understand. Well-drawn diagrams depict each recommended stage of rope rescue operations. The result is a very useful tool for rescue professionals at every skill level. CMC has been an innovator in the emergency services industry for over 40 years. In 1978 Jim Frank endeavored to make rescue safer and more efficient by founding California Mountain Company (later CMC Rescue, now CMC), a company that sourced and supplied specialized life safety equipment to the rescue community. Today, CMC is a globally recognized, employee-owned company that proudly manufactures many products in our ISO-certified Santa Barbara facility, and provides specialized education and training for rescue and rope access professionals. CMC recommends that all rope technicians seek qualified, hands-on instruction from a trusted source. The CMC School provides this type of training with a focus on learning-by-doing. Open enrollment and custom courses are available worldwide. For more information on CMC or the CMC School, visit [cmcpro.com](http://cmcpro.com).

**ROPE RESCUE MANUAL, 5/E.** 2017

A bunch of rope stuff Leroy Jenkins 2025-07-15 This manual is a detailed guide to lightweight remote rope rescue and Rapid Extrication Module Support (REMS) for wildland fire incidents and austere mountain environments. Created for rope technicians, wildland firefighters, medics, and incident leaders, this book blends practical rigging insights with operational risk management—providing a modular, minimalist approach to extrication in remote and rugged terrain. The manual emphasizes lightweight systems, fast deployment, and mission-driven adaptability for small teams (typically 4-6 personnel). Its guidance reflects real-world experience across steep slopes, isolated wilderness zones, and high-angle wildfire incidents—where REMS teams must move quickly and efficiently with limited gear. Key features include: Risk management frameworks tailored to mountain rescue and wildland environments Modular roles and team configurations (TL, Medic, Rigger, Navigator, Flex) Low-footprint kits: control lines, personal rigging, high directionals, and reeving Technical systems for lowering, raising, tensioned lines, counterbalance, and patient packaging Practical anchor strategies including trees, vehicles, and tensionless tie-offs Mapping & communication tools for digital and verbal coordination in remote areas Verbal command structures and dynamic team leadership under ICS principles Whether you're evacuating an injured firefighter from steep terrain or deploying a REMS team into a remote burn area, this manual arms you with the tools, mindset, and minimalist techniques needed for speed, safety, and success when every gram and every second counts.

Technical Rescue - High Angle and Swift Water Rescue Ben A. Hirst

2006-07 Exam Prep: Technical Rescue-High Angle is designed to thoroughly prepare you for a Technical Rescue certification, promotion, or training examination by including the same type of multiple-choice questions you are likely to encounter on the actual exam. To help improve examination scores, this preparation guide follows Performance Training Systems, Inc.'s Systematic Approach to Examination Preparation. Exam Prep: Technical Rescue-High Angle is written by fire personnel explicitly for fire personnel, and all content has been verified with the latest reference materials and by a technical review committee. Your exam performance will improve after using this system!

Life on a Line Dave Merchant 2007-06-20 Underground rescue from caves and mines is the most extreme form of technical rescue in the world, and demands the highest levels of skill in caving, engineering, excavation, geology, trauma medicine and of course ropework. Life On A

Line was the first specialist rope rescue book written for and by cave and mine rescuers, and has become the standard text for hundreds of rescue teams. The Second Edition is entirely new, with over 200 pages of expanded information and updated techniques for all aspects of ropework, from equipment selection and basic rigging to the complex mathematics of friction and traverses. Entirely new chapters cover casualty care, stretcher selection and rigging, large animal and expedition rescue, plus in-depth explanations of the standards and legal frameworks affecting today's teams. It remains an international textbook, with techniques and explanations aimed at both European EN/CE, American ASTM/NFPA and international ISO/UIAA standards.
