2021-10-21 We're experiencing a time when digital technologies and advances in artificial intelligence, robotics, and big data are redefining what it means to be human. How do these advancements affect contemporary media and music? This collection traces how media, with a focus on sound and image, engages with these new technologies. It bridges the gap between science and the humanities by pairing humanists' close readings of contemporary media with scientists' discussions of the science and math that inform them. This text includes contributions by established and emerging scholars performing across-the-aisle research on new technologies, exploring topics such as facial and gait recognition; EEG and audiovisual materials;

surveillance; and sound and images in relation to questions of sexual identity, race, ethnicity, disability, and class and includes examples from a range of films and TV shows including *Blade Runner*, *Black Mirror*, *Mr. Robot*, *Morgan*, *Ex Machina*, and *Westworld*. Through a variety of critical, theoretical, proprioceptive, and speculative lenses, the collection facilitates interdisciplinary thinking and collaboration and provides readers with ways of responding to these new technologies.

Women's Music for the Screen
Felicity Wilcox 2021-08-26

Women's Music for the Screen: Diverse Narratives in Sound shines a long-overdue light on the works and lives of female-identifying screen composers. Bringing together composer profiles, exclusive interview excerpts, and industry case studies, this volume showcases their achievements and reflects on the systemic gender biases women have faced in an industry that has long excluded them. Across 16 essays, an

international array of contributors present a wealth of research data, biographical content, and musical analysis of film, television, and video game scores to understand how the industry excludes women, the consequences of these deficits, and why such inequities persist - and to document women's rich contributions to screen music in diverse styles and genres. The chapters amplify the voices of women composers including Bebe Barron, Delia Derbyshire, Wendy Carlos, Anne Dudley, Rachel Portman, Hildur Guðnadóttir, Mica Levi, Winifred Phillips, and more. From the mid-twentieth century to the present, and from classic Hollywood scores to pioneering electronic music, these are the stories and achievements of the women who have managed to forge successful careers in a male-dominated arena. Suitable for researchers, educators, and students alike, *Women's Music for the Screen* urges the screen music industry to consider these sounds and stories in a

Communicating With Comic

Books unveils the basics in

comics writing from Steven

Philip Jones, a professional

comic book writer and

instructor. Comics Writing

shows you the step-by-step

process of creating a comics

script and how it is turned into

a finished comics page. With

the help of examples and comic book illustrations, this book will introduce you to: the different styles of comic book scripts; the tools of cartoon communications like panels, borders, and speech balloons; how to write a story as a comics script; the collaborative process between writer and artists; how to find and develop ideas for your comics stories; tips on creating characters; how to avoid common mistakes new comics writers often make; and other tips of the trade. If you're a writer wanting to find out how to write comic books, or if you are any kind of communicator wanting to learn the basics of communicating by using the comics medium Comics Writing can be a valuable tool.
