Educational Psychology

Robert E. Slavin 1997 This edition continues to have in-depth, practical coverage with a focus on the intentional teacher. It presents up-to-the-minute research that a reflective, intentional teacher can apply. The eighth edition of this popular text from renowned educational psychologist Robert Slavin translates theory into practices that teachers can use in their classrooms and focuses on the concept of intentionality. An "intentional teacher," according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become "intentional teachers," the author models best practices through classroom examples and offers questions to guide the reader. Book jacket. Principles of Psychology

Richard H. Price 1987
Psychology Philip G. Zimbardo 2003 Each chapter of this brief, manageable textbook focuses on the key questions and core concepts of psychology, supported by an extensive pedagogical structure designed to aid students. The text integrates a cross-cultural and multicultural perspective to make psychology meaningful for all readers.
