**Promote Reading Gains with Differentiated Instruction: Ready-to-Use Lessons for Grades 3-5**

Laura Robb 2024-02-13 Accelerate learning gains using differentiated instruction! This professional teaching resource supports educators with easy-to-use lessons that strengthen students' reading skills. This book provides teachers with 36 lessons that support differentiated instruction in grades 3, 4, and 5. The lessons focus on four advanced reading skills: visualize, infer, draw conclusions, and compare/contrast. Written by literacy experts and authors Laura Robb, Tim Rasinski, and David Harrison, this book offer useful lessons and reading strategies that meet students' diverse reading needs. The first part of this resource provides helpful information that supports the ready-to-implement lessons in the second part. These lessons create opportunities for individual and collective growth by reading, discussing, and writing about poems and texts. Build key literacy skills such as comprehension, critical thinking, vocabulary building, and word study with this teacher resource!

**Perfect Pairs, 3-5** Melissa Stewart 2023-10-10 Hands-on lessons can be fun and compelling, but when it comes to life science, they aren't always possible, practical, effective, or safe. Children can't follow wolves as they hunt elk, visit a prehistoric swamp, or shrink down to the size of a molecule and observe photosynthesis firsthand. But they can explore a whole world of animals, plants, and ecosystems through the pages of beautifully illustrated, science-themed picture books. Perfect Pairs, which marries fiction and nonfiction picture books focused on life science, helps educators think about and teach life science in a whole new way. Each of the twenty lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry-based investigative process to explore that idea;-from life cycles and animal-environment interactions to the inheritance of traits and the critical role of energy in our world. Each lesson starts with a Wonder Statement and comprises three stages. Engaging Students features a hands-on activity that captures student interest, uncovers current thinking, and generates vocabulary. The heart of the investigative process, Exploring with Students, spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables. Encouraging Students to Draw Conclusions shows students how to review and analyze the information they have collected. Bringing high-quality science-themed picture books into the classroom engages a broad range of students, addresses the Performance Expectations outlined in the Next Generation Science Standards, and supports the goals of the Common Core State Standards for English Language Arts. Even if you are science shy, Perfect Pairs can help you become a more confident teacher whose classroom buzzes

with curious students eager to explore their natural world.
