Symbolic Computation,

Number Theory, Special

Functions, Physics and

Combinatorics Frank G.

Garvan 2013-12-01 These are

the proceedings of the conference "Symbolic Computation, Number Theory, Special Functions, Physics and

Combinatorics" held at the Department of Mathematics,

University of Florida, Gainesville, from November 11

to 13, 1999. The main emphasis of the conference

was Computer Algebra (i. e. symbolic computation) and how

it related to the fields of Number Theory, Special

Functions, Physics and

Combinatorics. A subject that is common to all of these fields is q-series. We brought together those who do symbolic computation with q-series and those who need q-series including workers in Physics and Combinatorics. The goal of the conference was to inform mathematicians and physicists who use q-series of the latest developments in the field of q-series and especially how symbolic computation has aided these developments. Over 60 people were invited to participate in the conference. We ended up having 45 participants at the conference, including six one hour plenary speakers and 28 half hour speakers. There were talks in all the areas we were hoping for. There were three software demonstrations.

Discontinuous Groups and Riemann Surfaces (AM-79), Volume 79 Leon Greenberg
2016-03-02 Study 79 contains a

collection of papers presented at the Conference on Discontinuous Groups and Riemann Surfaces at the University of Maryland, May 21-25, 1973. The papers, by leading authorities, deal mainly with Fuchsian and Kleinian groups, Teichmüller spaces, Jacobian varieties, and quasiconformal mappings. These topics are intertwined, representing a common meeting of algebra, geometry, and analysis.
