Social Protest Thought in the African Methodist Episcopal Church, 1862-1939

Stephen Ward Angell 2000 "Angell and Pinn have selected a set of lively and significant examples of social protest literature from A.M.E. Church periodicals and demonstrated that these newspapers and journals represent a critically important location in which African Americans debated vital questions of the day."--Judith Weisenfeld, Barnard College Although the African Methodist Episcopal (A.M.E.) Church has long been acknowledged as a crucial institution in African American life during the nineteenth and twentieth centuries, relatively little attention has been given to the ways in which the church's publications influenced social awareness and protest among its members and

others, both in the United States and abroad. Filling that gap, this volume brings together a rich sampling of A.M.E. literature addressing a variety of social issues and controversies. As the editors observe, the formation of independent black churches in the early nineteenth century was not just a religious act but a political one with ramifications extending into every area of life. The A.M.E. Church, as a leader among those new denominations, made the educational, moral, political, and social needs of black Americans a constant concern. Through its newspapers and magazines--including the A.M.E. Church Review and the Christian Recorder--the church produced a steady flow of news articles, editorials, and scholarly essays that articulated its positions, nurtured intellectual debate, and contributed to the

ongoing struggle for racial equality. Drawing together writings from the Civil War era to the eve of World War II, this book is organized thematically. Each chapter presents a selection of A.M.E. sources on a particular topic: civil rights, education, black theology, African missions and emigrationism, women's identities, and socialism and the social gospel. Among the writers represented are such notable figures as W. E. B. Du Bois, Henry McNeal Turner, Ida B. Wells, Amanda Berry Smith, and Benjamin Tucker Tanner. An invaluable new resource for researchers and students, this book demonstrates both the variety and vitality of A.M.E. social and political thought. The Editors: Stephen W. Angell is associate professor of religion at Florida A&M University and author of Henry McNeal Turner and African-American Religion in the South. Anthony B. Pinn is associate professor of religious studies at Macalester College. He is the author of Why Lord? Suffering and Evil in Black Theology and

Varieties of African American Religious Experience and editor of Making the Gospel Plain: The Writings of Bishop Reverdy C. Ransom.

Online Education Greg Kearsley 2000 Online education or instruction--any form of learning/teaching via a computer network, i.e. Internet, WWW, or LAN-is rapidly becoming a major mode of educational delivery used by schools, colleges, and corporations. ONLINE EDUCATION is a comprehensive introduction to and overview of learning and teaching in "cyberspace." Kearsley, an author of Wadsworth's DISTANCE EDUCATION: A SYSTEMS VIEW, provides pre-service and in-service teachers, college faculty, and staff with a formal survey of this new and growing educational paradigm.

Management Richard L. Daft 2000 This edition aims to equip students with a solid foundation in the essentials of an introductory management class and introduces students to current trends, theories and issues in the dynamic field of management. Real-world examples are featured in the text.

Sherlock's Diseases of the Liver and Biliary System James S. Dooley 2018-08-06 A new, fully updated edition of the world's most famous book on liver diseases—with updating of all areas and inclusion of new specific topics, by internationally renowned specialists This brand new edition of the classic book on hepatology provides a concise, clearly presented and well-structured review across the whole spectrum of hepatobiliary diseases by some of the world's leading hepatologists and hepatobiliary specialists. Where many other hepatology textbooks provide detailed accounts of basic science and clinical management, Sherlock's Diseases of the Liver and Biliary System, 13th Edition takes a different approach.

Concentrating on the clinical decisions to be taken and the relevant supporting data, it is written and edited to maintain Sheila Sherlock's unique approach, in particular the clarity and layout of the text, and the explanatory figures and tables. The book is thus concise, highly

accessible, and generously illustrated with over 700 attractive color figures. There is a pithy approach to each disease based both on evidence and on the authors' experience, the hallmark of this book. Based on these elements, the 12th edition was awarded first prize in the 2012 British Medical Association Book Awards in the Internal Medicine category. Sherlock's Diseases of the Liver and Biliary System begins by introducing the anatomy and function of the liver to readers, continuing then with in-depth coverage of liver biopsy techniques and interpretation, and fibrogenesis and its assessment. There are then chapters on all aspects of liver and biliary disease including acute liver failure, cirrhosis, portal hypertension, hepatic encephalopathy, ascites, hepatitis B and C, alcohol and the liver, non-alcoholic fatty liver disease, drug related liver reactions, cholestatic, autoimmune and genetic liver diseases, benign and malignant tumours and not least liver transplantation. There are also chapters on the

liver in pregnancy, in the neonate, infancy and childhood, in systemic diseases and in infections. This new edition also features four new individual chapters focusing on coagulation, non-invasive assessment of fibrosis and cirrhosis; vascular diseases of the liver and portal vein thrombosis, and nutrition in liver disease. Digital downloads of the figures from this edition are offered on a companion website. Internationally recognized and loved, world-renowned hepatology book, first published in 1955 Takes a one-of-a-kind, clinical approach maintaining Sheila Sherlock's clarity and legacy of presentation Full colour throughout with 700 illustrative figures Wide faculty of international contributors Sherlock's Diseases of the Liver and Biliary System, 13th Edition is an ideal primer in hepatology for students and trainees in hepatology and gastroenterology, and a valuable resource for all specialist gastroenterologists and hepatologists, paediatricians, pathologists, radiologists, general physicians and specialist

nurses.

Irm W/Cd-Yce Concise Gardner 2003-04
Benefits of Model Syllabi Michael J. Strada 2006-08-24 No detailed examination of course syllabi in academia exists, a void that *Benefits of Model Syllabi* seeks to fill. This comprehensive

and timely work defines, explains, and illustrates the concrete features exhibited by model syllabi, in contrast to routine syllabi, in an effort to demonstrate how model syllabi foster positive synergies and enhance teaching and learning experiences. This work also infuses the dialogue about model syllabi with peripheral vision to reveal applications beyond the classroom walls. Intended for instructional development centers, higher education libraries, instructors, policy-makers, and department chairs, this book shows how model syllabi provide tools to widen and deepen the process whereby teaching is appraised in higher education. *Benefits of Model Syllabi* also shows how they can forge an unobtrusive feedback loop back to the classroom and strengthen curricular integration by establishing a fulcrum with which academic levels that often operate randomly (courses, programs, general studies) can be blended more meaningfully.

The Scholarship of Teaching and Learning in Higher Education Rowena Murray

2008-12-16 This book is designed for lecturers on a wide range of professional courses. It directly addresses questions that come up again and again in seminar discussions; questions that are fundamental to the values and perspectives

of academics across the disciplines: What is meant by the scholarship of teaching and learning in higher education? What is the purpose of higher education? Are lecturers really 'students' on these courses? How do you do 'reflective' writing? What do we do with all this theory and jargon? What does CPD in this area involve? How do you do 'research' on teaching and learning? This book does not treat each element of the curriculum separately – course design, assessment, evaluation of teaching etc. – since that approach has been well handled by others. Instead, like other books in the series, it addresses elements of the curriculum in an integrated way, thereby educating the reader in how to approach a range of higher education related issues. This book provides a scholarly introduction to the literature on these questions. Like other books in the series, it offers a concise treatment of complex questions. It also provides directions for future study. Contributors: Matthew Alexander,

Portfolio to Accompany Becoming a Master Student Ellis 2000-09 This portfolio is adaptable to any course that asks students to reflect, self-assess, and evaluate their own work. By following the evolution of skills through writing activities and exercises, students can create a catalog of their progress and reflect on the learning process.

Software Developers as Users Clarisse Sieckenius de Souza 2016-10-28 This book presents the SigniFYI Suite of conceptual and methodological tools, designed to uncover meanings inscribed in software, their origins, intent and consequences to identify and trace

correlating patterns; from software design and development to software use and experience. Based on the study of Semiotic Engineering, the book advances the e study of Human-Centered Computing (HCC), inviting professionals, researchers, teachers and students to reflect upon how subjective and cultural values manifest themselves through software models, programs and user interfaces. The authors weave a mesh of technical, theoretical and philosophical considerations of what it means to build and use software, exploring what we (professionals and non-professionals) mean by the pieces of software we design and develop, as well as what pieces of software mean to end-users and others. Explicitly dedicated to software designers, developers and users, *Software Developers as Users* is a provocative view of socio-technical communication in the digital age.

provides you with strategies for getting legal advice, keeping current on your mortgage payments, negotiating temporary delays in payments, restructuring loans, refinancing, filing for bankruptcy, and creating and sticking to a budget. You will learn about debt counselling and income maintenance, tax abatement, and public assistance programs. This book also provides details on the March 2010 modifications to the Home Affordable Modification Program (HAMP) and to the Federal Housing Administration (FHA) programs offered by the federal government to assist homeowners who have been affected by the economic crisis through no fault of their own. In addition, this book will show you how to decide if your property is worth saving, how to figure out how much time you have to act, how to use the courts to stop foreclosure, how to decide whether bankruptcy is your best option, and how to use your military status to prevent foreclosure. You will also learn about foreclosure

rescue scams, non-judicial foreclosure, judicial foreclosure, and notice of default. Also included is an explanation of the alternatives to foreclosure, such as special forbearance, mortgage modification, partial claim, pre-foreclosure, and deed-in-lieu of foreclosure. With foreclosures on the rise, it makes sense to know how to protect your home. The guide also provides you with tips, tricks, strategies, and secrets to prevent your home's foreclosure now before it is too late.
