*The Contest Problem Book VIII*

J. Douglas Faires 2022-02-25

For more than 50 years, the Mathematical Association of America has been engaged in the construction and administration of challenging contests for students in American and Canadian high schools. The problems for these contests are constructed in the hope that all high school students interested in mathematics will have the opportunity to participate in the contests and will find the experience mathematically enriching. These contests are intended for students at all levels, from the average student at a typical school who enjoys mathematics to the very best students at the most special school. In the year 2000, the Mathematical Association of America initiated the American Mathematics Competitions 10 (AMC 10) for

students up to grade 10. The Contest Problem Book VIII is the first collection of problems from that competition covering the years 2001–2007. J. Douglas Faires and David Wells were the joint directors of the AMC 10 and AMC 12 during that period, and have assembled this book of problems and solutions. There are 350 problems from the first 14 contests included in this collection. A Problem Index at the back of the book classifies the problems into the following major subject areas: Algebra and Arithmetic, Sequences and Series, Triangle Geometry, Circle Geometry, Quadrilateral Geometry, Polygon Geometry, Counting Coordinate Geometry, Solid Geometry, Discrete Probability, Statistics, Number Theory, and Logic. The major subject areas are then broken down into subcategories for ease of reference. The problems are

DIPLOMA DEPENDS ON

PASSING THIS ONE TEST The

New York State Geometry

Regents isn't just another math

test—it's a graduation

requirement. Fail it, and you're

retaking the course, delaying

graduation, missing college

application deadlines, and

explaining to every admissions

officer why your transcript

shows a failed Regents exam.

One test. One chance to get it

right. This guide makes sure

you don't waste it. □ WHY

CAPABLE STUDENTS FAIL

GEOMETRY REGENTS: You understand triangles. You can solve basic proofs. But the Regents doesn't ask basic questions—it tests Common Core standards with precision: exact construction sequences, multi-step coordinate proofs, transformation compositions, and circle theorem applications you've never seen combined this way. Most students fail because they reviewed the wrong content. They practiced simple problems when the Regents asks complex applications. They memorized formulas without understanding when to use them. They skipped construction problems and proof writing—the two areas where most points are lost. Classroom notes alone won't pass this exam. Generic geometry books don't align with NYS Common Core standards. They don't match Regents question formats. They don't teach the specific proof-writing style graders expect. Result? Students who "know geometry" fail because they prepared for the wrong test. □

delayed graduation (missing  
college deadlines), transcript  
damage (explaining failures to  
admissions), summer school  
(losing your break), and the  
stress of telling your parents  
you have to take it again. The  
emotional cost is higher than  
the academic one. □ STUDENT

We can't promise you'll pass.  
That depends on your effort,  
your math foundation, and test-
