**Travel Guides** Fodor's 2004  
NEW SERIES This new series  
beats out DK Eyewitness  
guides by emphasizing strong,  
graphic design while also  
supplying much more practical  
information than DK, including  
hundreds of hotel and  
restaurant reviews, how to get  
around and insider travel tips.

**True Visions** Emile H.L. Aarts  
2006-12-13 Ambient  
intelligence (AI) refers to a  
developing technology that will  
increasingly make our  
everyday environment sensitive  
and responsive to our  
presence. The AI vision  
requires technology invisibly

embedded in our everyday surroundings, present whenever we need it that will lead to the seamless integration of lighting, sounds, vision, domestic appliances, and personal healthcare products to enhance our living experience. Written for the non-specialist seeking an authoritative but accessible overview of this interdisciplinary field, True Visions explains how the devices making up the AI world will operate collectively using information and intelligence hidden in the wireless network connecting them. Expert contributions address key AI components such as smart materials and textiles, system architecture, mobile computing, broadband communication, and underlying issues of human-environment interactions. It seeks to unify the perspectives of scientists from diverse backgrounds ranging from the physics of materials to the aesthetics of industrial design as it describes the emergence of ambient intelligence, one of today's

most compelling areas of innovation.
