### **A+ Guide to Application**

**Essays** Alison Plus 2017-01-31

You must write an application essay. This essay might accompany an application to college, graduate school, or professional school. Or it might be part of a job application or a request for a scholarship or other funding. Regardless of the nature of the application, all of these essays are united by a common purpose: you want something, and this essay is part of the formal request made to the person or organization with the power to give it to you. Even though you might have seen other application essays, you still might not know how to compose yours. Maybe you have never written an essay

like this before, so you are unsure about how it differs from other kinds of essays. Maybe you have written an essay like this in the past, but you were unhappy with the product or the result and you want to improve your chances this time. Maybe, no matter your skills and experiences, you are just looking for extra help so that this kind of essay will be easier to complete. Few of us have been taught how to write this type of essay. Is it casual or academic? Is it supported with research? How much should you reveal about yourself? These and many more questions can make it tricky to even know where to begin. And it is very likely that you might not have anyone to help you with this. Because application essays are extra-curricular, even if you are a current student with access to writing instructors, your application essay will not be part of that syllabus. The writing expert teaching your class might not be available to instruct you in this type of writing in their time off. This booklet can help

you by showing you the complete process of writing an application essay for a scholarship, academic program, or employment opportunity. This practical, systematic method will start with a basic discussion of the purpose of application essays and end with a final proofreading. In between that first and last step, you will learn how to write each section of an application essay, piece by piece. These sectional breakdowns show you exactly what to include in different places within the essay. You will no longer need to guess what to write and where to write it. By using the breakdown, the various pieces of the document will work together to create a coherent and complete whole. Working the sections carefully will teach you the writing method for this type of essay. Then, when you must write another application essay, use this booklet as a reference to help you remember what each section can include. The more you use the method, the easier it will

be.

*Writing to Learn: An Introduction to Writing Philosophical Essays* Anne Michaels Edwards 1999-10-21

Based on the premise that one of the best ways for a student to understand a topic is to write about it, this is a book that teaches students how to write philosophical essays.

Geared toward first-time philosophy students, the book is a supplement for any Philosophy course in which the instructor requires the students to write essays. Most of the work involved in a Philosophy class is reading assigned material, thinking about it, and then writing about it - whether on an exam or in an essay written outside of class. This book is designed to make all three of those activities easier. Writing to Learn begins with helpful hints on how to read philosophy (chapter 2). In chapters 3 through 7 students are guided through several different types of essays, beginning with the simplest summaries that demonstrate knowledge and understanding, and progressing through essays that require the application of theories to new situations, the analysis and evaluation of

arguments used, and finally, the synthesis of several theories or arguments.
