Teacher Education and Institutional Change in South Africa

Multilingualism and Intercultural Communication H. Ekkehard

Wolff 2017-05-01 An in-depth look at the changing sociolinguistic dynamics that have influenced South African society. To date, there has been no published textbook which takes into account changing sociolinguistic dynamics that have influenced South African society.

Multilingualism and Intercultural Communication breaks new ground in this arena. The scope of this book ranges from macro-sociolinguistic

questions pertaining to language policies and their implementation (or non-implementation) to micro-sociolinguistic observations of actual

language-use in verbal interaction, mainly in multilingual contexts of Higher Education (HE). There is a gradual move for the study of

language and culture to be taught in the context of (professional)

disciplines in which they would be used, for example, Journalism and African languages, Education and African languages, etc. The book

caters for this growing market. Because of its multilingual nature, it

caters to English and Afrikaans language speakers, as well as the Sotho and Nguni language groups _ the largest languages in South Africa [and also increasingly used in the context of South African Higher Education].

It brings together various inter-linked disciplines such as Sociolinguistics and Applied Language Studies, Media Studies and Journalism, History

and Education, Social and Natural Sciences, Law, Human Language Technology, Music, Intercultural Communication and Literary Studies.

The unique cross-cutting disciplinary features of the book will make it a

must-have for twenty-first century South African students and scholars and those interested in applied language issues.

Adaptation and Learning in Control and Signal Processing 2001 S.

Bittanti 2002-09-19 In control and signal processing, adaptation is a natural tool to cope with real-time changes in the dynamical behaviour of

signals and systems. In this area, strongly connected with prediction and identification, there has been an increasing interest in switching and

supervising methods. Moreover in recent years, special attention has been paid to the ideas evolving round the theory of statistical learning as

a potential tool of improved adaptation. The IFAC workshop on Adaptation and Learning in Control and Signal Processing in 2001

gathered together experts in the field and interested researchers from universities and industry to present a full picture of the area. This

proceedings volume presents papers covering the following subjects:

Model reference and predictive control; Multiple model control; Adaptive control I/II; Adaptive control and learning; Learning; Adaptive control of

nonlinear systems I/II; Supervisory control; Neural networks for control; PID design methods; Sliding mode; Adaptive filtering and estimation;

Identification methods I/II.

The Botswana Law Reports 2004

The Engaged University David Watson 2011-07-15 The Engaged University is a comprehensive empirical account of the global civic

engagement movement in higher education. In universities around the

world, something extraordinary is underway. Mobilizing their human and intellectual resources, institutions of higher education are directly

tackling community problems - combating poverty, improving public

health, and restoring environmental quality. This book documents and

analyzes this exciting trend through studies of civic engagement and social responsibility at twenty institutions worldwide. This timely volume

offers three special contributions to the literature on higher education policy and practice: a historical overview of the founding purposes of

universities, which almost invariably included a context-specific element of social purpose, together with a survey of how these "founding"

intentions have fared in different systems of higher education; a

contemporary account of the policy and practice of universities - all over the world - seeking to re-engage with this social purpose; and an

overview of generic issues which emerge for the "engaged university."
