Peterson's Guide to Graduate Programs in the Biological Sciences

1997 Peterson's 1997-01-05 Graduate students depend on this series and ask for it by name. Why? For over 30 years, it's been the only one-stop source that supplies all of their information needs. The new editions of this six-volume set contain the most comprehensive information available on more than 1,500 colleges offering over 31,000 master's, doctoral, and professional-degree programs in more than 350 disciplines. New for 1997 -- Non-degree-granting research centers, institutes, and training programs that are part of a graduate degree program. Five discipline-specific volumes detail entrance and program requirements, deadlines, costs, contacts, and special options, such as distance learning, for each program, if available. Each Guide features "The Graduate Adviser", which discusses entrance exams, financial aid, accreditation, and more. The only source that covers nearly 4,000 programs in such areas as oncology, conservation biology, pharmacology, and zoology.

Peterson's Guide to Graduate Programs in Business, Education, Health, Information Studies, Law and Social Work 1997 Peterson's 1996-12-15 This guide contains listings for the most popular professions, covering over 13,000 programs in advertising, allied health, business, dentistry, education, health administration, human resources development, law, medicine, nursing, optometry, pharmacy, podiatry, public health, social work, veterinary medicine, and more.

Trends in Teaching Experimentation in the Life Sciences Nancy J. Pelaez 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence-based strategies for teaching biological experimentation to thereby improve existing and develop new curricula. It unveils the flawed assumptions made at the classroom, department, and institutional level about what students are learning and what help they might need to develop competence in biological experimentation. Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist. It includes explicit evidence-based guidelines for educators regarding the teaching, learning, and assessment of biological research competencies. The book also provides practical teacher guides and exemplars of assignments and assessments. It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain. This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence-based decision-making around public policy. It will be beneficial to life science instructors, biology education researchers and science administrators who aim to improve teaching in life science departments. Chapters 6, 12, 14 and 22 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Academic Year Abroad 2000 Institute of International Education, New York, NY. 2000 This guide provides descriptions of 2,617 study-abroad opportunities that take place during the academic year and are at least one academic quarter in length. Introductory information provides information on the Institute of International Education (IIE), IIE publications, how to use the guide, abbreviations, planning for study abroad, additional resources for study abroad, and suggestions on how to read study abroad literature. The main body of the guide consists of individual program descriptions arranged alphabetically by geographic region and country. In addition to specific country and city listings, there is a "worldwide" section for programs that are active in more than one world region. Each listing provides information on: institutional program sponsor, name of the program, program site, dates, subjects of study, eligibility, credit, instructional language and methods, cost, housing, deadline for application, other information, and contact information. Programs are indexed by sponsoring institution, consortia, fields of study, special options, and cost ranges. (RH)
