Dreams and Visions in the Early Middle Ages Jesse Keskiäho 2015-02-19 Dreams and visions played important roles in the Christian cultures of the early Middle Ages. But not only did tradition and authoritative texts teach that some dreams were divine: some also pointed out that this was not always the case. Exploring a broad range of narrative sources and manuscripts, Jesse Keskiäho investigates how the teachings of Augustine of Hippo and Pope Gregory the Great on dreams and visions were read and used in different contexts. Keskiäho argues that the early medieval processes of reception in a sense created patristic opinion about dreams and visions, resulting in a set of authoritative ideas that could be used both to defend and to question reports of individual visionary experiences. This book is a major contribution to discussions about the intellectual place of dreams and visions in the early Middle Ages, and

underlines the creative nature of early medieval engagement with authoritative texts.

Forthcoming Networks and Sustainability in the IoT Era Fadi Al-Turjman 2022-03-31 This book aims to provide a platform to the researchers and practitioners from both academia and industry to meet and share their experience and knowledge. *Forthcoming Networks and Sustainability in the IoT Era (FoNeS-IoT)*, Volume 1 & 2, aims to bring together

researchers and professionals to exchange ideas on the advancements in technology, application areas for advanced communication systems and development of new services, and facilitate a tremendous growth of new devices and smart things that need to be connected to the Internet through a variety of wireless technologies.

Parallel to this, new capabilities such as pervasive sensing, multimedia sensing, machine learning, deep learning, unmanned aerial vehicles, cloud and edge computing, energy efficiency/harvesting, and computing power open the way to new domains, services, and business models beyond the traditional mobile Internet. The new areas in turn come with various requirements in terms of reliability, quality of service, and energy efficiency. These are only some examples of the challenges that are of interest to researchers in *Forthcoming Networks and Sustainability in the IoT Era (FoNeS-IoT)*. It will explore the latest developments, innovations, and best practices

within the IoT and the impact it has on industries including: manufacturing, transport, supply chain, communication, government, legal sectors, financial services, energy utilities, insurance, health care, retail, and many others. It provides opportunities for academicians and scientists along with professionals, policymakers, and practitioners from various fields in a global realm to present their research, contributions, and views, on one forum, and interact with members inside and outside their own particular disciplines. Papers describing applications of IoT in e-Health, Smart Systems & Management, Communication, and Education are also included, but the focus is mainly on how new and novel techniques advance the performance in application areas, rather than a presentation of yet another application of conventional tool. Papers on such applications describe a principled solution, emphasize its novelty, and present an in-depth evaluation of the techniques being exploited.

The Catechumenate in Late Antique Africa (4th -6th centuries) Matthieu Pignot

2020-07-13 In *The Catechumenate in Late Antique Africa (4th-6th centuries)* Matthieu Pignot explores how individuals became Christian in ancient North Africa. Before baptism, converts first became catechumens and spent a significant time of gradual integration into the community through rituals and teaching. This book provides the first historical study of this process in African sources, from Augustine of Hippo, to canon of councils,

anonymous sermons and 6th-century letters. Pignot shows that practices varied more than is generally assumed and that catechumens, because of their liminal position, were a disputed and essential group in the development of Christian communities until the 6th century at least. This book demonstrates that the catechumenate is key to understanding the processes of Christianisation and conversion in the West.
