\*\*This is the chapter slice "Cell Structures & Functions" from the full lesson plan "Cells, Skeletal & Muscular Systems"\*\*  
What do cells, bones and muscles have in common? They are all part of the human body, of

course! Our resource takes you through a fascinating study of the human body with current information written for remedial students in grades 5 to 8. We warm up with a look at the structures and functions of cells, including specialized cells. Next, we examine how cells make up tissues, organs and organ systems. Then the eight major systems of the body are introduced, including the circulatory, respiratory, nervous, digestive, excretory and reproductive systems. Then on to an in-depth study of both the muscular and skeletal systems. Reading passages, activities for before and after reading, hands-on activities, test prep, and color mini posters are all included. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Volume One, The Musculoskeletal System, opens

with the building blocks of your body—the cells. Your body is built from many kinds of cells and tissues, and you will learn how they work. Even the bones and muscles that give you strength and speed depend on many types of cells. This book will: Show you the ins and outs of the bones in your skeleton and how they function Give detail as to how your marvelous muscles move you Provide a detailed glossary in the back for quick reference! Throughout the book you will learn things to do to keep your body healthy. But in a fallen, cursed world things are bound to go wrong. We will look at what happens when disease or injury affects bones and muscles. Volume Two, Cardiovascular and Respiratory Systems. From the level of the cell to the organs themselves, we will examine these systems in depth. Here you will learn: The incredible design of the human heart and how it is really “two pumps in one!” How blood moves through an incredible network of arteries and veins What “blood pressure” is and the

marvelous systems that help regulate it. How the respiratory system allows us to get the “bad air out” and the “good air in.” Along the way, we will see what happens when things go wrong. We will also suggest things to do to keep the heart and lungs healthy. Although the world insists that our bodies are merely the result of time and chance, as you examine the human body closely, you will see that it cannot be an accident. It can only be the product of a Master Designer.
