Technical Report Writing Today Daniel G. Riordan 2005 Technical Report Writing Today provides thorough coverage of technical writing basics, techniques, and applications. Through a practical focus with varied

examples and exercises, students internalize the skills necessary to produce clear and effective documents and reports. Project worksheets help students organize their thoughts and prepare for assignments, and Focus boxes highlight key information and recent developments in technical communication. Extensive individual and collaborative exercises expose students to different kinds of technical writing problems and solutions. Annotated student examples—more than 100 in all—illustrate different writing styles and approaches to problems. Numerous short and long examples throughout the text demonstrate solutions for handling writing assignments in current career situations. The four-color artwork in the chapter on creating visuals keeps pace with contemporary workplace capabilities. The Ninth Edition offers many new examples, exercises, samples, and articles, the latest information on using electronic resumes and documenting electronic sources, more on group work, and new Ethics and Globalization sidebars that highlight these two important topics in the technical communication field. Chapter exercises have been labeled to guide students in various goals: You create, You analyze, You revise, and Group. In this revision, the authors have focused on streamlining and updating key chapters, rather than on substantially changing the text's effective organization. Chapter 1: Definition of Technical Writing has been thoroughly revised to include complete sections on ethics and globalization. Theoretical sections have been updated to include current thinking about the role of communication between people. New exercises and examples are included. Chapter 2: Profiling Audiences, has been completely revised to feature current thinking about defining audiences, including an emphasis on the tasks that audiences must perform after reading, and a section on creating audience profiles. Worksheets have been revised, and a section on meeting quality benchmarks has been added. Chapter 3: The Technical Writing Process, substantially updated, offers a current

description of the document creation process and includes recent thinking on information design. Chapter 6: Designing Pages, has been revised and simplified to make the complex process of page design easier for students to grasp. Chapter 12: Memorandums and Informal Reports, heavily revised, now includes more emphasis on, and new examples of, the IMRD report format. The chapter also includes a focus section with an expanded treatment of email. Chapter 15: Recommendation and Feasibility Reports presents a new feasibility report created by a small business to determine whether or not to market an item. Chapter 18: Oral Presentations now focuses on PowerPoint. The theory of oral reports is expanded to include recent criticisms of PowerPoint presentations and advice on creating effective presentations. Appendixes include A Brief Handbook (Appendix A), focusing on the sentence, punctuation, and mechanics issues most relevant to technical writing; and Documenting Sources (Appendix B), covering the most up-to-date APA and MLA methods for documenting print and electronic sources. The text-specific instructor web site features such resources as sample syllabi, a transition guide, an assessment guide, and chapter-by-chapter teaching suggestions. The student site offers additional student samples (including web sites built by their peers), cha

Proposal Writing for Clinical Nursing and DNP Projects, Second Edition Wanda Bonnel 2017-07-28 Amazon, 11 reviews for 5-star average: "Excellent, very helpful, to the point, concise without leaving out important details." "Really helps and is easy to understand." This practical, concise, and accessible guide for graduate students and advanced clinicians delivers step-by-step guidelines for integrating research and best evidence to produce concise, well-written project proposals. Health care professionals in advanced practice are increasingly being asked to be able to deliver clinical project proposals using best evidence for advancing quality patient care. With the same "must know" clinical scholarship tools of the first edition, this revision provides practical guidelines of common project models for developing and writing a tight proposal from start to finish while leaving room for the unique nature of most clinical project topics. The second edition

includes a completely new chapter on quality improvement concepts, new project proposal abstracts, and new information specific to the DNP project from the AACN. Using the same three-part organization to walk through the intricacies of planning, writing, and completing scholarly project proposals, this new edition also adds new key features to keep readers engaged with the text and their own ongoing or forthcoming proposal. Chapters have been updated to include websites for additional learning, as well as advice from DNP students who have themselves successfully completed project proposals. Reflective questions, tips for completing proposals, exemplars, and reader activities throughout the book facilitate readers' greater understanding of projects and subsequent proposals. New to the Second Edition: A new chapter on quality improvement concepts Advice from DNP students who have themselves completed proposals Chapter updates and edits for enhanced clarity Websites for additional learning New information specific to the DNP project based on guidance from the AACN Increased emphasis on the Project Triangle, an important foundational structure Key Features: Provides topflight guidance in proposal writing for DNP and other nursing clinical projects Details parameters for integrating scholarship with clearly communicated professional objectives Contains numerous writing prompts and questions that guide students in reflective scholarly writing Offers examples of good writing, reflective questions, and tools for self-assessment Offers helpful tips for making proposals concise yet complete

Reporting Technical Information Kenneth W. Houpp 1998 The leading text in technical writing since 1968, *Reporting Technical Information* covers basic strategies of composing, techniques of presentation, and

document design. It also provides detailed analyses of document applications, including oral presentation, and features a complete handbook of grammar and usage. Appendices supply lists of technical reference books and guides along with a complete bibliography. This ninth edition of *Reporting Technical Information* places greater emphasis than any previous edition on international communication and the implications of global and multicultural correspondence. Documentation instructions include MLA style, Chicago Style, and APA style; a style guide for citing the Internet as a source is included as well. The new edition includes material on writing collaboratively via email; synchronous discussions and FTP sites; and expansion of "electronic communication." The design of on-line documents has been added to "document design" and the treatment of graphical elements now includes electronic graphics programs. Instruction on using the Internet in job searches is featured as well. The ninth edition is supplemented by the Tech Community website <http://www.abacon.com/techcommunity>. Resources that support technical communication activities for both students and instructors can be found at this site.
