**Thinking with Demons** Stuart Clark 1999 This is a work of fundamental importance for our understanding of the intellectual and cultural history of early modern Europe. Stuart Clark offers a new interpretation of the witchcraft beliefs of European intellectuals based on their publications in the field of demonology, and shows how these beliefs fitted rationally with many other views current in Europe between the fifteenth and eighteenth centuries. Professor Clark is the first to explore the appeal of demonology to early modern intellectuals by looking at the books they published on the subject during this period. After examining the linguistic foundations of their writings, the author shows how the writers' ideas about witchcraft (and about magic) complemented their other intellectual commitments--in particular, their conceptions of nature, history, religion, and politics. The result is much more than a history of demonology. It is a survey of wider intellectual and ideological purposes, and underlines just how far the nature of rationality is dependent on its historical context.

*Exodus* Victor P. Hamilton 2011-11-01 Victor Hamilton, a highly regarded Old Testament scholar with over thirty years' experience in the classroom, offers a comprehensive exegesis of the book of Exodus. Written in a clear and accessible style, this major, up-to-date, evangelical, exegetical commentary opens up the riches of the book of Exodus. Hamilton relates Exodus to the rest of Scripture and includes his own translation of the text. This commentary will be valued by professors and students of the Old Testament as well as pastors.
