University Physics for the Physical and Life Sciences Philip R. Kesten 2012-06-08 Authors Philip R. Kesten and David L. Tauck take a fresh and innovative approach to the university physics (calculus-based) course. They combine their experience teaching physics (Kesten) and biology (Tauck) to create a text that engages students by using biological and medical applications and examples to illustrate key concepts. University Physics for the Physical and Life Sciences teaches the fundamentals of introductory physics, while weaving in formative physiology, biomedical, and life science topics to help students connect physics to living systems. The authors help life science and pre-med students develop a deeper appreciation for why physics is important to their future work and daily lives. With its thorough coverage of concepts and problem-solving strategies, University Physics for the Physical and Life Sciences can also be used as a novel approach to teaching physics to engineers and scientists or for a more rigorous approach to teaching the college physics (algebra-based) course. University Physics for the Physical and Life Sciences utilizes six key features to help students learn the principle concepts of university physics: • A seamless blend of physics and physiology with interesting examples of physics in students' lives, • A strong focus on developing problem-solving skills (Set Up, Solve, and Reflect problem-solving strategy), • Conceptual questions (Got the Concept) built into the flow of the text, • "Estimate It!" problems that allow students to practice important estimation skills • Special attention to common misconceptions that often plague students, and • Detailed artwork designed to promote visual learning Volume I: 1-4292-0493-1 Volume II: 1-4292-8982-1 Dissertation Abstracts International 2007

Authentic School Improvement for Authentic Leaders Victoria Carr 2024-10-31 Authentic School Improvement for Authentic Leaders charts a full improvement journey of a school from a 'Requires Improvement' Ofsted rating, through a second, to a resounding 'Good'. It reveals the impact that a school leader can have on the motivation and engagement of teachers, parents and pupils and how this translates not just to their overall happiness, but on academic standards and systemic, long-lasting school improvement whilst maintaining their own well-being. Bringing together a wide range of accessible and relatable school improvement practices, the chapters cover all aspects of school leadership, from operational systems to academic standards and staff morale to pupil numbers. Full of strategies, takeaways, observations and anecdotes, the book illustrates that being authentic and leading with integrity is possible for all and provides tangible results that may support positive Ofsted outcomes but are not driven by them. Including a Foreword by Ross Morrison McGill, this is essential reading for all headteachers and senior leaders in primary and secondary, mainstream and specialist, maintained and academy schools.

Asking the Right Questions Edie L. (The book) helps you answer these questions: Where are we now? Where do we want to go? How will we get there? How will we know we are "getting there"? How can we sustain the focus and momentum we're building? Holcomb gives you group processes that really work and lists tips for facilitators and team leaders. A matrix helps you review available skills and determine what additional skills and training your team may need.

Teacher Education for Global Englishes Language Teaching Denchai Prabjandee 2024-12-12 This book presents a model of transformative, empowering and critically oriented language teacher education to prepare English teachers to implement Global Englishes Language Teaching (GELT). GELT's importance to learners' needs for communication in the globalized world means that it receives tremendous interest from

language teacher educators worldwide, underlining the risks posed by gaps in teachers' knowledge of how to implement it. This book fills in those gaps, with accessible theoretical foundations and practical examples drawn from the successful work of the M.Ed. in Teaching English as a Global Language (TEGL) at Burapha University, Thailand. Through critically oriented frameworks, the TEGL program equips in-service English teachers with a critical lens to examine their current practices, challenge the sociocultural and educational backgrounds that teachers bring into teacher education, and empower them in transforming their classroom practices to correspond with the GELT paradigm. The book highlights how the global spread of English impacts language teacher education, discusses the theoretical foundations underlying the design of teacher education for GELT, addresses the knowledge base for preparing teachers to use GELT and examines the applications of teacher education for GELT. It is vital reading for graduate students, teacher educators, and researchers in language teacher education and beyond.

Getting Started with Doctoral Supervision Gina Wisker 2026-06-18 *Getting Started with Doctoral Supervision* is a uniquely inclusive book in its exploration of the diversity of doctoral candidates, research projects, disciplines, and modes of supervision. It is written for those who are beginning to supervise postgraduate students. This book is based on the three dimensions of supervision – personal, learning, and institutional – and considers ways of working with individual candidates throughout their doctoral or master's learning journeys. It focuses on motivations, personal engagement, wellbeing, and strategies for addressing difficulties. Seeing supervision as a developmental learning dialogue, this book emphasises enabling candidates' experiences as learners who develop new knowledge through supervisory guidance. It also addresses the changing demands of the institution placed on doctoral study and supervision, broadly conceived, including the construction and presentation of doctoral work – whether as a thesis, creative work, or publications – within realistic timeframes and in approved appropriate forms. *Getting Started with Doctoral Supervision* will take you on a research and experience based, reflection and action provoking journey and is a must-read guide for all those coming to supervision for the first time or looking to refresh their practice. The 'Insider Guides to Success in Academia' offers support and practical advice to doctoral students and early-career researchers. Covering the topics that really matter, but which often get overlooked, this indispensable series provides practical and realistic guidance to address many of the needs and challenges of trying to operate, and remain, in academia. These neat pocket guides fill specific and significant gaps in current literature. Each book offers insider perspectives on the often implicit rules of the game -- the things you need to know but usually aren't told by institutional postgraduate support, researcher development units, or supervisors -- and will address a practical topic that is key to career progression. They are essential reading for doctoral students, early-career researchers, supervisors, mentors, or anyone looking to launch or maintain their career in academia.
